

ATLAS GREY

Atlas Grey is a fine-grained limestone from the Atlas Mountains in Morocco, with soft, layered shades of grey. The color sits in that sweet spot between warm and cool, so it works with almost anything—bleached oak, dark walnut, black steel, plaster, or soft whites. Laid across a space, it reads as one continuous, tailored surface rather than a busy pattern, which is why designers use it in open-plan kitchens, gallery-style living rooms, and calm, spa-like bathrooms. You can run the same stone out to terraces and pool areas, creating that seamless “inside meets outside” look you usually see in resorts and contemporary villas.
