

DALLE DE MONTRESOR

Dalle de Montresor is antique French limestone reclaimed from historic homes and estates around Montresor in the Loire Valley. This is a stone that has already lived through decades of real use. Broad limestone flags have softened edges, worn surfaces, and small irregularities from people walking on them, not from a factory trying to fake age. The character you see is earned—every mark, dip, and variation is a record of real history brought into a new project.
