

MIDNIGHT MARBLE

Midnight Marble is a striking wall cladding stone defined by its deep charcoal to dark gray tones, enhanced by contrasting white veining and occasional rusty brown accents. The texture is rugged and natural, with irregularly shaped pieces that fit together in a dynamic, mosaic-like layout. This stone creates a bold, dramatic effect, making it ideal for modern, rustic, or high-contrast architectural designs. Its natural variation in shade and pattern gives each installation a unique, organic character.
